Enjoying the nature

...& broadening the understanding of the world

The e-Spotlight gives students, faculty, and alumni a peek into what's going on in the college.

NATURE TRAIL AND ENVIRONMENTAL TRIP

On the 5th March 2021, students of Oshwal College environmental club made a one-day field trip to Kereita Forest. This was in line with the College's commitment to support environmental sustainability and students' participation in extracurricular activities.

The students took part in zip-lining, tree planting, horse riding, archery, paint balling and nature walk after which they headed back having fulfilled the objectives of the trip.

STAY AHEAD WITH OUR CLOUD COMPUTING TRAINING

Cloud computing is one of the most in-demand skills that employers are looking for in ICT graduates. This is mainly because cloud computing and cloud services are increasingly being adopted by organisations to add flexibility, efficiency and improve service delivery through innovation. Businesses are moving their products and services to the cloud since it's cheaper and easier than maintaining huge servers.

However, a group of researchers from OpsRamp, a cloud-based IT operations management platform, discovered that one of the technology skills lacking in job applicants is cloud computing and that this has stifled digital innovation and effective service delivery. The results of their 2018 cloud skills survey indicate that 94% of IT firms are struggling to find candidates with the right skills in cloud computing. Today, the skills gap is so intense that researchers have termed the situation as a “full-blown crisis” that is hurting business operations.

To bridge this gap, Oshwal College is now offering cloud computing training programmes to help students get the right skills and be ready for the future. The course is based on the industry best cloud computing platforms and therefore, it is one of the best programmes for preparing the students to respond to the current and future needs of the industry.

The course content is top quality, well organized and covers the evolving universe of cloud computing in an easy to understand manner. Among the keys areas of focus include the foundational concepts of cloud computing, infrastructures, platforms, functions, services and the different implementation models.

To learn how cloud computing can help you to “Get Ahead” please contact us at: admissions@oshwalcollege.ac.ke or call +254 729 644 691. Enrolment into this programme is currently open.

OSHWAL COLLEGE

THE OSHWAL COLLEGE STUDENTS ASSOCIATION (OCSA)

Oshwal College has a students' body which acts as a platform that unites all the students in the College. The body represents students and coordinates all the students' activities.

The office bearers are democratically elected by other students at the beginning of every calendar year. To ensure effective and fair elections, the office of the Head of Sports in conjunction with the office of the Dean of Students ensures that the nominations and elections are widely publicized within the college to ensure wide participation.

This year, the elections for the vacant positions were held on 27th January 2021 making the body fully constituted.

Congratulations to all our current office bearers!

THE OCSA OFFICIALS 2021
